

Best Practice:

‘Social responsibilities & awareness learning’

The Context:

In this era of materialistic approach towards life, students now fully absorbed in attaining their materialistic goals by any means hence they seem to neglect their social responsibilities. Despite many attempts, to make the citizens aware of social issues viz. environment conservation, gender equality, disaster management and inculcation of national spirit, these issues are confronting us with more severity. These issues can be attended to at family, immediate society and at the level of educational institutions in which they are studying. College feels it its imperative to address these issues through creating awareness among students by involving them in extension activities. These activities could be carried out by college in consultation with the other institutes or cells of the college. This may bring about a positive change in the attitude of students towards these social issues.

The Practice:

Our Department carries out these awareness extension activities for the benefit of other college/ school students through ‘Adhigam’ (*An educational drive from B.H college family towards society to enhance learning*), and volunteers. Every year, College plans and implements various extension activities that address social issues which our department actively takes part. Some of the awareness issues that our departments actively involves in some other colleges and schools through visiting those institutes.

- a) Creating Awareness about Environment Conservation
- b) Sensitizing Students to Gender Issues
- c) Exposure to Disaster Management
- d) Health and Hygiene Awareness
- e) Inculcation of Human Values and National Spirit
